- to streamline the purchasing process.

Self-project

React js App ()
Jun, 2024 - Jun, 2024

This React application provides combinations of bus routes available for a single stop, offering the convenience of utilizing multiple buses for travel.

- I leverage React to develop applications, utilizing a modular approach
- with several components. Proficient in implementing responsive designs,
- I enhance user interfaces with Tailwind CSS for streamlined and visually
- appealing experiences.
-

Ai integrated Youtube suggestion react app (working)

Front-end Dev
Mar, 2023 - Jun, 2024

YouTube Feature: Refers to YouTube's built-in tools and settings that help users find content

- Discover Lesser-Known Channels: Emphasizes that you can find channels that are not mainstream or widely recognized.
- From Various Countries: Highlights that the content is international, offering a diverse range of perspectives and cultures.
